IDENTIFIERS *ERIC

ABSTRACT

The result of a comprehensive search for writings about the Educational Resources Information Center (ERIC) published between 1985 and 1988, this annotated bibliography lists 107 documents and journal articles about ERIC that were entered in the ERIC database during that period. The 1964-1978 edition cited 269 items. The 1979-1984 edition cited 131 items. With the 107 items cited in this 1985-1988 edition, this series of bibliographies now documents a total of 400 items written on the subject of ERIC (e.g., documents of historical interest in the development of ERIC; "How to" items whose object is to initiate the user into the system; cross-database comparisons involving ERIC; user surveys; evaluations of ERIC performance; reports describing particular computer search programs or efforts; ERIC in the context of educational R&D dissemination; reviews of ERIC practices or results; how to teach ERIC; thesaurus development; how ERIC relates to some subset of the educational community; ERIC and microforms; ERIC's current attributes, size, products, etc.). Entries are listed by ERIC accession number with the ED accession numbers (for documents) appearing first, followed by the EJ accession numbers (for journal articles). The usual ERIC abstracts (or annotations) and indexes (subject, author, and institution) are included. (MES)

An Annotated Bibliography of Documents And
Journal Articles About ERIC
1985-1988

Introduction

The Educational Resources Information Center (ERIC) began operations in the early 1960's. Since that time, there has been a steady production of literature about ERIC. These materials approach ERIC in several different ways, e.g. documents of historical interest in the development of ERIC; "How to" items whose object is to initiate the user into the system, cross-database comparisons involving ERIC, user surveys; evaluations of ERIC performance, reports describing particular computer search programs or efforts, ERIC in the context of educational R&D dissemination; reviews of ERIC practices or results; how to teach ERIC, thesaurus development; how ERIC relates to some subset of the educational community, ERIC and microforms, ERIC's current attributes, size, products, etc. As one of the most economical and frequently searched databases, ERIC has played a major role in the dramatic growth of online searching. As one of the first major bibliographic databases to be offered on compact disk (CD-ROM), ERIC has figured heavily in the evaluations made by librarians and information scientists of this new medium.

These materials are of interest from several points of view. They will often answer a user's question about ERIC; they are essential to any studies of ERIC; some are appropriate to classroom use in the teaching of ERIC; they are indicative of what is considered worth writing about in ERIC.

Given these uses, ERIC has attempted to maintain some degree of bibliographic control over the more substantive materials. This bibliography represents the results of a comprehensive search for documents about ERIC published during the period 1985-1988 that can be found in the ERIC database.

Each item has been screened for suitability. Items that were simply news announcements have been eliminated, as have items of poor quality, bibliographies based on ERIC accessions (but without other ERIC relevance), repetitive brochures explaining the well-known basic facts about ERIC, and general material on the dissemination of educational R&D, but without sufficient ERIC connection.

This is the third bibliography in a series that began in 1978. The first edition, covering 1964-1978, contained 269 entries (arranged by Author) and was first issued in December 1978 (see ED-169 955). This first bibliography was comprehensive in that it was not limited to items found in the ERIC database; however, abstracts were not provided for the entries and there were no indexes. The second bibliography, covering the period 1979-1984, contained 131 entries (arranged by accession number), and was issued in September 1985 (see ED-262 784). In order to be able to provide abstracts and indexes, an effort was made to accession every entry found into the ERIC database so that the system itself could be used to produce its own bibliography.

This third bibliography, covering the period 1985-1988 (except for a few earlier stragglers), contains 107 entries and follows the same methodology. All items found were accessioned into ERIC and the bibliography provides the usual ERIC abstracts (or annotations) and indexes (Subject, Personal Author, Institution). Entries are arranged by their ERIC accession number (ED for documents in Resources in Education (RIE); EJ for journal articles in Current Index to Journals in Education (CIJE), with the ED accessions appearing first, followed by the EJ accessions. Full ERIC records have been printed, including abstract and index terms, in order to make apparent the relevance of each item to ERIC.

These three bibliographies supplement one another. All three together cover the period 1964-1988 and contain a total of 407 citations.

ERIC Feasibility Study: A Small Scale Examination of the Potential Value of the ERIC Data Base to Educationalists in Britain. Report No. 2. Lancaster Univ. (England). Centre for Educational Research and Development.

Spons Agency—British Library, London (England). Research and Development Dept.

Pub Date—Feb 77

Note—25p.; British Library Project on Experimental Information Services in Education Project SI/CT/011; Some parts may be marginally legible due to print quality

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Computers, Data Processing, *Educational Research, Educational Resources, Information Retrieval, Information Systems, *International Educational Exchange, *Relevance (Information Retrieval)

Identifiers—*ERIC, Great Britain

The purpose of this small scale study was to make a preliminary assessment of the potential value of the ERIC data base for educators in Britain. On-line searches of the ERIC data base were conducted for a sample of fourteen users who were asked to comment on the relevance of retrieved materials. Results indicate that ERIC can provide access to relevant information not obtainable from other sources. Also included is a review of the use of computerized ERIC data base retrieval systems in countries other than the United States. (Author/STS)

The Educational Information System for Ontario. A Guide for Using.

Ontario Inst. for Studies in Education, Toronto.

Spons Agency—Ontario Dept. of Education, Toronto.

Pub Date—Apr 76

Note—14p.; For related documents, see IR 006 633-636 and IR 006 990

Pub Type—Guides - Non-Classroom (055) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Comparative Analysis, Glossaries, Guides, Information Seeking, *Online Systems, Records (Forms)

Identifiers—*Educational Information System for Ontario, ERIC

This general user guide to the Educational Information System for Ontario (EISO) deals with the simple logistics of acquiring material from the system. Since EISO was developed as a way for Ontario citizens to use the Educational Resources Information Center (ERIC) data base in the United States, a preliminary description of ERIC is provided. Questions answered by the guide include who uses EISO, how to ask a computer question, who/what is a search analyst, how to make a search request, what kind of answer will be given, how long it takes, and how much it costs. A brief explanation of the way the computer links information using Boolean operators (AND, OR, NOT) is also provided, as well as a sample request form and computer printout, information for ordering microfiche, and a glossary of terms. The ERIC Data Access System (EDAS) is an information retrieval system developed at Eastern Illinois University to access the Educational Resources Information Center (ERIC) database and make it available to Eastern faculty and students in a convenient and timely fashion. This paper describes

briefly why and how Eastern developed and implemented this system, as well as how it is operated at the present time, and some future implications. (Author)

Identifiers—*ERIC, Information Analysis Products

The experiences with ERIC which are profiled for three public school systems reflect specific user requirements in different environments. In "Meeting Professional Education Information Needs: A Profile of How the Alexandria, Virginia City Public Schools Use the ERIC System," Dale Brown discusses the types of searches used by administrators and teachers at the city school system level. Patricia Mautino, in "Watch ERIC Grow!" describes three levels of ERIC use in New York State, through the Educational Programs and Studies Information Service (EPSIS), which provides state-wide support, the Board of Cooperative Educational Services (BOCES) at the county level, and individual user services at the school level. The use of microforms at East Detroit High School is discussed in Lewis Saks' article, "The Little Grey Cells, The Little Black Cards: An Approach to ERIC Microfiche," as well as a recent study done by Pat Gilmore which surveyed the use and knowledge of ERIC by teachers in the East Detroit School system. Descriptors—*Automatic Indexing, Clearinghouses, *Information Retrieval, Information Services, *Information Systems, *Online Systems, Search Strategies

Based on a series of studies performed by ERIC/Information Resources staff and consultants which focused on the activities of over 40 experienced online searchers, this report offers the following suggestions for enhancing certain online retrieval system features and making improvements in ERIC vocabulary: (1) the implementation of an online rotated descriptor display, (2) the introduction of an online rotated identifier display, and (3) the use of links between the controlled vocabulary and free text. A brief history of ERIC online services precedes a cursory look at some current ERIC searching practices. In addition, an appendix provides three overviews which compare several elements of ERIC searching with those used by three commercial bibliographic retrieval services presently marketing the ERIC database. Identifiers—Educational Information, Europe

The Library of Educational Documentation in Florence, Italy began work in 1980 on the establishment of an educational documentation system for Italy. Recognition of its role in this regard was accorded by the Regional Institutes for Educational Research, Innovation and Teacher Training (IRR-SAE) and by the European Centre for Education (CEDE) in Frascati. The library envisages itself as a central point to which all organizations, research-

ers, scholars, and educators who are interested in educational problems can refer, confident of finding useful information and thereby avoiding repetitive research. With the acquisition of a large mainframe computer (IBM 370/148) in December 1981, the library began to establish an independent computerized system for the handling of educational documentation. In order to put this beginning effort on the strongest possible basis, the library decided to hold an international meeting on the subject of educational documentation and to invite speakers from other countries that had operational systems in this area. The proceedings of the meeting were envisaged as an opportunity for analysis and comparison that would benefit the Italian developmental efforts. Some of the major papers presented were: (1) A. M. Furtado, "The Present and the Future of the International Network for Educational Information"; (2) W. F. de Regt, "Eudised, a Decentralised System with a Common Thesaurus"; (3) S. Pissarro, "Information et Education: situation actuelle et perspectives. Le rôle du Centre National de Documentation Pédagogique (France)"; (4) E. Ekman, "Information on Actual Educational Research in Sweden and on Educational Documentation"; (5) W. E. de Regt, "Educational Policy Documentation in the Netherlands"; (6) A. Gwilliam, "Educational Documentation in the United Kingdom: Developments and Research"; (7) C. Hoover and T. Brandhorst, "Development and Current Status of the Educational Resources Information Center. A Model Bibliographic Control System Covering the Literature of Education in the United States"; (8) G. Biondi, "The Educational Documentation System in Italy: First Steps." (WTB)

A broad range of education-related topics are addressed in this annotated bibliography, which presents citations and abstracts for 117 publications produced by the 16 ERIC Clearinghouses in 1983. An introduction explains the ERIC system, clearinghouse publications, the organization of this bibliography, and the availability of clearinghouse publications. A statistical summary by year (1968-1983) shows the number of documents included for each clearinghouse in the series of which this bibliography is the most recent. Document resumes are provided from the following clearinghouses: (1) Adult, Career, and Vocational Education; (2) Counseling and Personnel Services; (3) Reading and Communication Skills; (4) Educational Management; (5) Handicapped and Gifted Children; (6) Languages and Linguistics; (7) Higher Education; (8) Information Resources; (9) Junior Colleges; (10) Elementary and Early Childhood Education; (11) Rural Education and Small Schools; (12) Science, Mathematics and Environmental Education; (13) Social Studies/Social Science Education; (14) Teacher Education; (15) Tests, Measurement, and Evaluation; and (16) Urban Education. A listing of ERIC Digests, i.e., short user-oriented reference sheets formerly called Fact Sheets or Short Reports, is also provided. (DMC)

Identifiers—ERIC, *National Education Practice File

The purpose of the National Education Practice File (NEPF) was to find out from educational practitioners what types of materials would be of value to them; to locate the types of information identified; and to make this information available to them through the development of a computerized file of practitioner-oriented materials. The 2-year, 4-phase project, which took place from October 1, 1982 to September 30, 1984, was conducted by the San Mateo Educational Resources Center (SMERC) with two subcontractors—the Social Science Education Consortium, contractor for the ERIC Clearinghouse on Social Studies/Social Science Education; and the ERIC Processing and Reference Facility.

Phase I was concerned with the development of clear and concise specifications of the types of materials needed by practitioners to support improvement efforts at the classroom and building level. The principal activity of Phase II was the creation of a separate computerized test file of all materials already in ERIC that met these specifications. These items were tagged "Practitioners," using a new Target Audience data element developed for NEPF. The development of new sources of practitioner-oriented materials and the addition of such documents to ERIC were the primary activities in Phase III. Evaluation of the file was conducted at nine official test sites in Phase IV. Recommendations based on experiences with and evaluation of the project were made in three major categories: the educational practitioner as audience for ERIC; building a database for practitioners; and outreach. The project resulted in the identification and tagging of 46,344 ERIC documents (RIE) and articles (CIJE) with the new "practitioners" Target Audience tag. Twenty-three appendices to the final report are presented: (1) Report of Working Group Meeting; (2) Search Strategy; (3) ERIC Processing Manual (Guidelines for Applying Target Audience); (4) Revision in Timelines; (5) Acquisitions and Selection Plan, plus Addendum; (6) Document Acquisition and Selection Chart; (7) Agenda-Field Test Site Training; (8) Recordkeeping Forms, Explanatory Materials; (9) Full Text Documents (Guidelines for Processing); (10) Sensing Network Survey and Highlights of Results; (11) New Acquisitions Sources; (12) Journal Articles Compiled (Guidelines for Compiling); (13) Journal Articles Compiled (Guidelines for Processing); (14) Flyers, Letters, Explanatory Materials Used by Clearinghouses; (15) 25 Step Processing Plan; (16) Copyright Laws: Implications for ERIC; (17) Acquisitions Sources-List; (18) Sample Search Packet; (19) Client Telephone Interview Form; (20) Boulder Valley Information Packet; (21) Interview Form-ERIC Clearinghouse Directors; (22) Interview Form-Practice File Searchers; and (23) Statistics on NEPF Documents (Target Audience, Level of Availability, Number of Microfiche, Length, Type). Descriptors—Computers, *Databases, *Educational Resources, *Information Retrieval, Library Collections, *Research Tools, Search Strategies
Identifiers—ERIC Fact Sheets

Step-by-step instructions for locating material in the Educational Resources Information Center (ERIC) database are provided. Following an introduction, information is presented in three main sections—manual searching, computer searching, and using search results. Subdivisions under manual searching describe who can or should do a manual search of ERIC, how to locate ERIC microfiche collections, procedures for conducting a manual search—including how to use and understand notations in the ERIC Thesaurus and ERIC monthly indexes—and searching for a specific document in ERIC. The second section, "Computer Searches," contains subsections on when to do a computer search, types of information that will be retrieved from such a search, cost, tips for getting good results, and computer search turnaround time. The final section, "Using the Results of ERIC Searches," describes how copies of ERIC documents and journal articles can be obtained. A six-entry resource section cites additional ERIC publications on the ERIC system. (LP)

Descriptors—*Computer Software, *Databases, *Information Retrieval, *Microcomputers, Telecommunications

Identifiers—*ERIC, ERIC Digests

This fact sheet offers basic instructions on connecting to the ERIC database for individuals who own or have access to a microcomputer and are familiar with ERIC and how to search it through a database terminal. Software, hardware, and telephone line components necessary to make a microcomputer act as a database terminal are outlined. The discussion of software describes the need for a terminal emulator and lists desirable features for terminal software, including the capabilities to print and save, access to command mode, format display, default setting, and a status indicator. Considerations in configuring the software to allow interface or access to database vendors is explained and contact telephone numbers for DIALOG, BRS, and SDC (the three major vendors) are listed. The discussion of hardware requirements covers parallel transmission, the communications interface, modems, and data transmission speed. A list of popular microcomputers and the necessary hardware and software components required to access the vendors includes the following models: Apple II, II+, IIe; Atari 400/800; Commodore VIC, Commodore PET/CBM; IBM Personal Computer; Texas Instruments 99/4, 99/4a; and TRS-80 Models I, II, and III. Identifiers—*Australia, *Educational Information, ERIC

This core thesaurus of terms suitable for indexing Australian educational literature was developed by the Australian Council for Educational Research by means of a systematic and thorough revision of the "Thesaurus of ERIC Descriptors." Based on the actual terminology of education in Australia, this thesaurus includes: key words and phrases used by indexers as subject headings, or "descriptors," in information retrieval systems; an alphabetical display of all subject index terms (headings); extensive scope notes to clarify meaning and usage of terms; and a full introduction and comprehensive explanatory chapters. Introductory materials include sections on thesaurus development, vocabulary maintenance, the Australian Education Index database, information retrieval search aids, guidelines for indexing, structure and format of the thesaurus, and descriptor groups. Identifiers—Educational Information, *ERIC, *Information Equity

Educational dissemination has contributed a number of innovative concepts and strategies to information science. Much-misunderstood ERIC, which combines research reports with policy documents and teaching materials, is one of the first and best examples of a field-oriented rather than discipline-oriented database. Building on ERIC, federal education agencies have experimented continuously with extension or outreach to the school districts. Three extension roles have emerged among agents or specialists who work with the schools; the concept of entitlement helps to explain differences among the roles. Education's strong equity premises have led to the concept of information equity as a prerequisite of equal access and equal treatment. To serve millions of educators in more than 15,000 school districts and 3,000 colleges and universities, innovative dissemination in education should now focus on the concepts of efficiency and economies of scale. Descriptors—*Databases, *Information Retrieval, Man Machine Systems, *Microcomputers, Online Searching, Online Systems, *Search Strategies

Identifiers—Apple II Plus, *ERIC, *Microsearch, User Cordial Interface

A project at the ERIC Clearinghouse on Information Resources has resulted in the extension of the ERIC database to microcomputer. Small subject-related files for current-awareness purposes are downloaded from the ERIC tapes and are made available for searching with Apple II Plus microcomputers. Since the target audience for this system is non-online searchers, a user interface has been developed which simplifies searching and uses a formatted screen to guide users through the search process. The small amount of material which can be stored on a 5 and 1/4 inch diskette has been compensated for in part by the subject-matter orientation of the individual discs and in part by providing supplementary programs which permit the contents of the discs to be printed, thus producing a bibliography with extensive indexes. Field-testing of MICROsearch has guided its current endeavors—the

provision of record entry program to permit local files to be created which can also be searched with MICROsearch, and the development of a special user interface for teaching searching. (Author)

Identifiers—Current Index To Journals In Education, Educational Information, *ERIC, Manual Searches, Resources In Education

This chapter describes how ERIC addresses the problems resulting from four conditions that make it unique in the indexing field: (1) its subject area includes a wide range of subspecialists; (2) its clientele is extremely diverse; (3) it has a dual retrieval purpose for both manual and computer access; and (4) its retrieval is challenged by the inexact language of the social sciences. Since these problems also affect the way ERIC is organized, discussion focuses first on ERIC's functions, activities, and structure. The types of indexes and other products and services it provides are then discussed, and indexing guidelines and aids are described in detail to show not only how the information system coordinates its indexing process, but also how that process affects retrieval. The concluding section describes quality control in ERIC in terms of vocabulary maintenance procedures. Appendices include a listing of the ERIC Clearinghouses with descriptions of their areas of specialization; sample displays from the print indexes; sample ERIC descriptors representing population concepts; sample publication types and their codes; and sample descriptor group codes. Identifiers—*Computer Searches, ERIC, International Nursing Index, Medline, National Health Planning Information Center, Social Science Citation Index

Intended to provide the nursing community with a comparative analysis of four major computerized document retrieval systems and one manual system providing coverage of the nursing literature, this study compares the indexing vocabulary, database coverage, and retrieval performance of the Educational Resource Information Center (ERIC), International Nursing Index (INI), Medical Literature Analysis and Retrieval System On-Line (MEDLINE), National Health Planning Information Center (NHPIC), and Social Science Citation Index (SOCIAL SCISEARCH). Results of searches on the five systems were compared with bibliographies on the same topics—continuing education for nurses, patient classification, problem oriented records, nurse practitioners, and nurse staffing. According to the measures used in this study, MEDLINE had the best coverage of the nursing and non-nursing journals; had the most accurate indexing capability; and produced the most complete retrieval results for nursing topics. Although INI indexed the greatest number of nursing journals, its overall retrieval performance was not as complete as that of MEDLINE, ERIC, NHPIC, and SOCIAL SCISEARCH coverage of the nursing literature was found to be

limited in scope and focus, and it was concluded that these systems should be searched in addition to MEDLINE for appropriate topics: nursing education (ERIC), health planning (NHPIC), and journals not usually included in nursing collections (SOCIAL SCISEARCH). (BBM)

Document Not Available from EDRS.

Descriptors—Comparative Analysis, Databases, Definitions, Education, Hypothesis Testing, Indexing, *Information Systems, Psychology, *Social Sciences, *Subject Index Terms, Thesauri, *Vertical Organization

Identifiers—*Conceptual Equivalency

Analysis of current methods for achieving compatibility or convertibility between two or more indexing languages draws attention to the need for a switching language to establish equivalency between concepts, not terms. In order to examine the assumption of the conceptual equivalency of identical terms in the indexing languages of related subject fields, a specific case in which a single term appears to have different meanings in the information systems for two social science disciplines is examined. Hierarchical charts constructed to display the arrays under the term "cognitive processes" in the ERIC Thesaurus and the Thesaurus of Psychological Index Terms demonstrated that the term appears in different hierarchical frameworks in the two indexing languages. Three hypotheses were proposed to account for the observed differences. The first hypothesis, that "cognitive processes" represents different concepts to educationists and psychologists, was rejected by examination of formal definitions. A comparison of textbooks on cognitive processes for the two disciplines did not provide evidence to support the second hypothesis, that educationists and psychologists view the concept within different conceptual frameworks. The third hypothesis, that the two hierarchies represent research interests in the two fields, was rejected following an investigation of current journal articles. The results suggest that the nature of social science terminology and problems associated with its use in indexing languages would prove to be a fruitful area of research with specific ramifications for the design of switching languages. Identifiers—Educational Information, *ERIC, France, United States

This overview of the ERIC system begins with a brief history of the system; a description of the types and numbers of materials contained in the database; sources of types of information for educators that are not processed by ERIC; and the various publications and reference materials produced by and for the system. The analysis of ERIC usage in the United States that follows is based on the final report of the Cost and Usage Study of the Educational Resources Information Center (ERIC) System,

which was conducted by King Research in 1981. This analysis includes data on types of access points for the ERIC system and the services they offer; the level of knowledge of ERIC in the educational community; a qualitative evaluation of ERIC products and services; and ERIC coverage of materials related to disadvantaged groups. The components of the ERIC system and their functions are then described, including relationships among the various units and products and services designed to make ERIC more available to users. System operations, resource allocation, and costs are also discussed. The article concludes with a discussion of cultural, organizational, and policy concerns that would need to be addressed if the ERIC model were to be adapted to meet the needs of French educators. Identifiers—*ERIC, *ERIC Clearinghouse on Rural Education Small School, ERIC Digests

Written for potential users of ERIC, this digest provides basic facts about the information storage and retrieval system, the migrant education materials available, and the role of the ERIC Clearinghouse on Rural Education and Small Schools (ERIC/CRESS). The following questions are answered: (1) what is ERIC and how does it work; (2) what retrieval terms should be used to find migrant education materials; (3) what types of publications will be found and what audiences will be addressed in ERIC documents about migrant education; (4) where do migrant documents in ERIC come from; and (5) how can ERIC/CRESS assist the person seeking information? Practical suggestions are made for successful computer searches. These include limiting the search to specific years, specific authors, certain kinds of literature, or geographic regions of interest. A broad range of education-related topics are addressed in this annotated bibliography, which presents citations and abstracts for 142 publications produced by the 16 ERIC Clearinghouses in 1984. An introduction explains the ERIC system, clearinghouse publications, the organization of this bibliography, and the availability of clearinghouse publications. A statistical summary by year (1968-1984) shows the number of documents included for each clearinghouse in the series of which this bibliography is the most recent. Document resumes are provided from the following clearinghouses: (1) Adult, Career, and Vocational Education; (2) Counseling and Personnel Services; (3) Reading and Communication Skills; (4) Educational Management; (5) Handicapped and Gifted

Children; (6) Languages and Linguistics; (7) Higher Education; (8) Information Resources; (9) Junior Colleges; (10) Elementary and Early Childhood Education; (11) Rural Education and Small Schools; (12) Science, Mathematics, and Environmental Education; (13) Social Studies/Social Science Education; (14) Teacher Education; (15) Tests, Measurement, and Evaluation; and (16) Urban Education. A listing of ERIC Digests, i.e., short user-oriented reference sheets formerly called Fact Sheets or Short Reports, is also provided. (THC)

Identifiers—Educational Information, *ERIC

The result of a comprehensive search for documents about the Educational Resources Information Center (ERIC) published between 1979 and 1984, this bibliography lists 131 entries which approach ERIC in several different ways: documents of historical interest in the development of ERIC; "how to" items whose object is to initiate the user into the system; cross-database comparisons involving ERIC; user surveys; evaluations of ERIC performance; reports describing particular computer search programs or efforts; ERIC in the context of educational research and development dissemination; reviews of ERIC practices or results; how to teach ERIC; thesaurus development; how ERIC relates to some subset of the educational community; ERIC and microforms; and ERIC's current attributes including size and products. This supplement to a 1978 bibliography includes subject, personal author, and institution indexes. The 131 entries are arranged by their ERIC accession numbers (ED for documents in Resources in Education; EJ for journal articles in Current Index to Journals in Education), with the ED accessions appearing first, followed by the EJ accessions. Full records have been printed, including the abstract, in order to make the relevance of each item to ERIC abundantly clear. (THC)

Identifiers—*Bibliographic Retrieval Services, End Users. *ERIC

This manual provides information to aid home computer owners in performing literature searches of ERIC and other education and social science databases using the BRS Information Technologies "After Dark" system. Assuming some familiarity with printed ERIC indexes or online searches, this manual is divided into five chapters. It is suggested that potential searchers should study the first two chapters before going online. These chapters cover the basic concepts of developing a search strategy and the commands used by the BRS "After Dark" system. The third chapter discusses various ways to modify the search strategy regarding the retrieval of too few or too many citations. The next chapter explains how to accomplish common types of non-subject searches: specific author, publications from a specific institution, speeches from a specific meeting, or certain types of publications. The final chapter provides basic information concerning other searchable databases: Educational Testing Service Test Collection; Exceptional Child Education Resources; Mental Measurement Yearbook; Psychological Abstracts; and Resources in Computer Education. Attachments include: Search Strategy Worksheet; ERIC Field Name and Abbreviations; "After Dark" Command Summary; Mandatory Level Descriptors; and Publication Type Codes. (PN)

This presentation at a seminar for library staff and students describes the Educational Resources Information Center (ERIC) system as an information system designed to provide users with ready access to primarily English-language literature dealing with education by establishing a database, publishing abstracting journals, and reproducing documents in printed and/or microfiche formats. The document includes a description of the organizational composition of ERIC; information on searching ERIC both manually and online; a brief discussion of search strategy development; a description of the format of the two printed abstracting journals, Current Index to Journals in Education (CIJE) and Resources in Education (RIE); estimated costs of computer searches; and procedures for requesting an online search at the Institute of Education Library (IE), Singapore. A brief summary of the results of pre- and post-seminar questionnaires administered to 50 staff and student participants in the staff interaction seminar concludes this document. Appendices include a list of the 16 ERIC clearinghouses with their two letter codes; a sample online search strategy; sample online output; and copies of the pre- and post-seminar questionnaires with tabulated results. Identifiers—*ERIC, ERIC Digests, Modems

Focusing on how to use a microcomputer as a terminal for searching online databases, this digest addresses the following topics: (1) hardware and software requirements; (2) configuring the software; and (3) basic requirements for specific microcomputers. Special features in communications software

which allow microcomputer users to do database searching are described, such as print commands, save commands, access to command mode, format display, default setting, and status indicator. Suggestions for software configuration include telephone numbers for three major database vendors—DIALOG, BRS (Bibliographic Retrieval Services), and SDC (System Development Corporation). Finally, the hardware necessary to use a computer as a terminal is discussed, including interface modules, modems, modular jacks, acoustic couplers, and internal modems. A list of 10 different microcomputers and the hardware and software necessary to use them as terminals completes this digest. (JB)

Designed to demonstrate that the ERIC (Educational Resources Information Center) database is a useful source of information for educational practitioners at all levels, this digest provides an introduction to the ERIC system and describes the National Education Practice File Project (NEPF). This 2-year project was designed to find out from educational practitioners the kinds of information they would find useful, locate appropriate materials, and make this information easily accessible to its audience through the development of a computerized file of practitioner-oriented materials. An overview of the ERIC system briefly describes its acquisition and processing activities; the creation of computerized files for online searching; the publication of two monthly indexes, Resources in Education (RIE) and Current Index to Journals in Education (CIJE); and the types of materials the system contains. Information on the NEPF includes the purpose of the study, its participants and activities, and the results of an evaluation of the resulting computerized file made up of documents that were already in the ERIC file as well as new acquisitions. Emphasis on practitioner documents since the completion of ERIC is briefly demonstrated, and a study of the cost and usefulness of ERIC that was conducted for the Department of Education is noted. Hints on accessing ERIC are also provided, and a list of four references complete the digest. (JB)

Asserting that few teachers can provide examples of how they actually used educational research to shape an instructional decision, this position paper argues that as presently structured, the educational research institution does not appear to be effective in communicating products of its work to practitioners. The paper examines obvious barriers to communication between researchers and practitioners including the tendency of researchers to focus on abstractions (hypotheses, theoretical implications, statistical analyses, etc.) versus practitioners' needs for clear descriptions of instructional methods and curriculum materials, including how well they worked and with what types of student. The formation of a Professional Resources Information Network Computerized for Educators (PRINCE) is proposed to provide teachers with practical information and materials directly tailored to meet specific instructional needs. PRINCE would parallel ERIC (the Educational Resources Information Center), the existing information network available to researchers. Following a general discussion of the problem, this document includes the following sections: (1) The Research/Practice Dilemma in ERIC; (2) The Current ERIC System; (3) Barriers to Practitioner Use; (4) Attempts to Make the System More Accessible to Practitioners; (5) Can an Information System Help Improve Schools? and (6) PRINCE: Professional Resources Information Network Computerized for Educators. Eighteen references are listed. (THC)

Identifiers—*ERIC

ORI, Inc., and SilverPlatter, Inc., have joined together in a joint venture to offer the ERIC database to the public on compact laser disc (CD-ROM). Data from both "Resources in Education" (RIE) and "Current Index to Journals in Education" (CIJE) will be offered on a single disc from January 1983 to the present (with the disc being updated every quarter). Data prior to 1983 will be offered on archival discs (two for RIE; one for CIJE). This case study reviews the various reasons why ERIC is interested in CD-ROM as a method of data dissemination and the reasons ORI chose to link with SilverPlatter in offering such a service. Some of the early experiences in developing the product are related: acquiring market information, configuring the product, developing the retrieval system, alpha testing, allocating corporate responsibilities, pricing, etc. It is noted that ERIC satisfies all five factors that have been cited as determining whether a product is likely to be successful if delivered on CD-ROM technology: (1) large volume of data; (2) stable data not requiring frequent updates; (3) geographically dispersed user community; (4) most users have access to microcomputers; and (5) additional processing enhances the value of the data delivered. A consolidation of the Directory of ERIC Microfiche Collections and the Directory of ERIC Search Services, this directory lists organizations that provide their users and clientele with significant access to the ERIC database and its related resources. Included are organizations that provide computerized searches of the ERIC database, have sizeable collections of ERIC microfiche, and subscribe to and collect the various ERIC publications. Material is presented in three sections covering the domestic United States, outlying U.S. territories, and non-U.S. countries. Where applicable, entries are grouped geographically by country, state, and city

within these designations. A sample data entry with explanations is provided, and ERIC information service provider statistics are presented in three tables. Additional information includes a list of ERIC Clearinghouses, a brief discussion of online searching, information for ordering subscriptions to "Resources in Education," an ERIC Fact Sheet, an ERIC Document Reproduction Service order form, and a data input form for the directory. Direct Access to Bibliographic Databases by End-Users: Menu Facilitation versus Native Command Language.

Stanford Univ., Calif. Libraries.

Spons Agency—Council on Library Resources, Inc., Washington, D.C.

Pub Date—[85]

Note—222p.; Best copy available.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC09 Plus Postage.

Descriptors—Academic Libraries, Access to Information, Comparative Analysis, Graduate Students, Higher Education, Intermediate Differences, *Menu Driven Software, *Online Searching, Online Systems, Questionnaires, *Relevance (Information Retrieval), Search Strategies, *Users (Information), *User Satisfaction (Information) Identifiers—Bibliographic Data Bases, *Command Language, DIALOG, ERIC, INSPEC, *Intermediaries, SciMate

After receiving training in searching INSPEC or ERIC on DIALOG using either the SciMate menu or native commands, 40 doctoral students performed free searches on research topics of their choice. In comparison with 20 control subjects (doctoral students for whom a free search was performed by a skilled librarian), the experimental subjects were equally satisfied with their retrievals, which were smaller but higher in relevance than those produced by the intermediaries, and were more likely to follow up the search by consultation of the references listed. Subjects instructed to use native commands committed fewer errors during training, required less training time, and interacted more with the databases than subjects trained on the SciMate menu. An examination of differences by sex revealed that women indicated that they would actually consult a higher proportion of the references listed than men, and that women tended to assign a higher monetary value to their searches than men. It is concluded that end-users can learn to do their own literature searches effectively, with or without a menu interface. Results are discussed in terms of cognitive and motivational determinants, statistical evidence is displayed in 40 tables, and references are provided. Study questionnaires, quizzes, and end-user searching workbooks are appended. (KM)

Descriptors—Access to Information, *Censorship, *Cost Effectiveness, *Educational Media, Educational Research, Educational Technology, Evaluation Criteria, Evaluation Problems, Government Publications, *Information Dissemination, Program Effectiveness, Program Evaluation, *Public Agencies

Identifiers—Department of Education, ERIC, *Publication and Audio Visual Advisory Council, *Publications Review Board, Womens Educational Equity Act

This report discusses an oversight investigation of the Department of Education's Publication and Audio Visual Council (PAVAC) and its successor, the Publications Review Board (PRB). Background information is provided about the review process for publications and products; the Women's Educational Equity Act (WEEA) program; educational

laboratories and centers; the PAVAC record; and the modification of the review process. Findings concern rejection of products of the educational laboratories and centers and WEEA; cost of review procedures; training and expertise of PAVAC and PRB members; educators' access to educational equity materials; bias in PAVAC review of WEEA products; lack of consideration of appeals prepared for WEEA products; conflict with the WEEA amendments of 1984; PAVAC review and rejection of publications that it was not required to review; and delays and uncertainty resulting from PAVAC and PRB reviews. As a result of these findings, four conclusions and six recommendations are presented concerning cost-cutting measures, scope of PRB review, dissemination of rejected WEEA products, decisions concerning Educational Resources Information Center (ERIC) product dissemination, and the elimination of photocopies and products costing under \$2,500 from the review process. Statements of dissenting and supplemental views are provided. (KM)

This description of the development of the Educational Resources Information Center (ERIC) compact disc by two companies, SilverPlatter and ORI, Inc., provides background information on ERIC and the ERIC database, discusses reasons for choosing to put the ERIC database on compact discs, and describes the formulation of an ERIC CD-ROM team as part of the development process. A review of steps along the way in the development of a CD-ROM version of the ERIC database includes discussions of agreements and contracts; division of labor; marketing information/surveys; product design; conversion/inversion specifications; retrieval system capabilities; alpha test sites; news releases, flyers, letters, status reports, and order forms; publicity (articles, conference exhibits, advertising); and documentation and user manuals. The following information is appended: (1) ORI/SilverPlatter Division of Responsibility; (2) ERIC Database Conversion/Inversion Specifications; (3) Search Features—Comparison of ERIC on SilverPlatter with DIALOG 2; (4) Projected Retrieval System Improvements; (5) SilverPlatter order form and subscription agreement; (6) SilverPlatter pricing information; (7) Resources in Education (RIE) Sample Record; (8) listing of ERIC Clearinghouses; and (9) ERIC Fact Sheet. Identifiers—*ERIC

Several projects were undertaken in 1986 for the purpose of maintaining and improving the ERIC system. This report focuses on one of the projects

that involved two surveys of users of the ERIC system and its products. Survey I consisted of a stratified sample of 500 ERIC Standing Order Customers (SOCs). These sites subscribe to the ERIC microfiche collection and represent the heaviest users of ERIC. The respondents represented all types of SOCs and included 70 percent of the state departments of education and school districts that subscribe to the ERIC microfiche. Survey II was a sample of 200 administrators and teachers selected from a list of 2,800 schools surveyed periodically since 1969 by the SMEAC Information Reference Center at The Ohio State University. In addition, a sample of 50 administrators and teachers were sampled in Ohio. Each survey is described in terms of its: (1) sample population; (2) data collection procedures; and (3) data results and analysis. A summary is provided as well as a discussion of specific user recommendations. Appendices contain survey letters and questionnaires. (ML)

Identifiers—*ERIC

This compilation consists of various letters and documents issued for public comment during 1986-1987 by the Office of Educational Research and Improvement (OERI) of the U.S. Department of Education, during its examination of the Educational Resources Information Center (ERIC) system to determine any needed changes and improvements. This compilation includes only the material that was distributed for public comment. It does not include the minutes of meetings of advisory groups formed during 1986 to study ERIC, the background papers that were prepared to stimulate internal discussion, or the many letter reactions that were received from the field in response to these public announcements. The components of this package are: (1) "ERIC in Its Third Decade" (a statement of principles); (2) "Domains or Scope Areas to Be Included in the ERIC System"; and (3) "Summary of the Educational Resources Information Center (ERIC) Redesign" (an implementation paper). Appended to the third component are two position papers: (1) "Access ERIC" (including "ERIC Partners"), by John Collins; and (2) "Adjunct Clearinghouses," by Elizabeth Payer. Except insofar as they may be modified by further public comment or congressional action, it is OERI's intent to proceed to modify ERIC along the lines described in these documents. These changes involve: (1) Merging the Clearinghouses on Teacher Education and Counseling and Personnel Services into a "School Professionals" Clearinghouse; (2) Changing the names of seven Clearinghouses; (3) adding a Clearinghouse on "Education Statistics," to be located within the Center for Education Statistics (CES); (4) Initiating a new ERIC system component called "ACCESS ERIC" to concentrate on marketing, promotion, advertising, public relations, training, system-wide information analysis products, and liaison with other information systems; (5) Initiating a formal users' group to be called "ERIC Partners"; (6) Initiating a new kind of "Adjunct Clearinghouse" that will, at no cost to ERIC, acquire and process for ERIC the educational literature in the distinctive areas (e.g., art) in which their host organizations may have a special interest. Descriptors—Computer Software, *Databases, Elementary Secondary Education, Higher Education, *Information Retrieval, *Information Services, Public Schools, Schools of Education, *Search Strategies, Statistical Analysis, User Satisfaction (Information)

Identifiers—Computer Based Resource Units, ERIC, Michigan Educational Assessment Program, Michigan Professional Personnel Register, *Wayne State University MI

Conducted over the past 15 years by the College of Education at Wayne State University (WSU), the studies of several databases that are described in this paper were designed for the specific purpose of providing factual information related to the problems of education in the public schools and in higher education. As a matter of precept the study was carried out on the following lines: (1) only databases that are in the public domain were used; (2) efforts were made to gather the original documents identified by searching the databases; (3) existing software was used with a database when it was available; and (4) descriptive statistics were used in the analysis of data. Descriptions of the use of five databases at WSU—the Educational Resources Information Center (ERIC); the Michigan Professional Personnel Register (MPPR); Computer Based Resource Units; the Michigan Educational Assessment Program (MEAP); and the WSU College of Education Data Base—include explanations of how they were developed for use at the site, and comments on the successes and failures experienced in their use. The 26

references cited include sources that provide detailed descriptions of various studies conducted at WSU and their results. (DJR)

Identifiers—*Bibliographic Data Bases, Current Index to Journals in Education, *ERIC, Resources in Education

This brief review of the Educational Resources Information Center (ERIC) system is intended to make users more aware of (1) the system as a whole, (2) the process of indexing educational literature for the database, and (3) the role of the Thesaurus of ERIC Descriptors in the overall information dissemination process. An overview of the ERIC system is provided, and a discussion of ERIC vocabulary maintenance includes descriptions of the 1977 Vocabulary Improvement Project (VIP) and the Vocabulary Review Group. In addition, information retrieval methods and tools for manual and computer searching are considered; and a discussion of ERIC's indexing provides general guidelines as well as detailed discussions of educational and age level descriptors, identifiers, and publication types. Further hints for relevant retrieval consider non-subject access and the target audience. Also included in the text are a listing of ERIC's searchable fields and vendors' field access labels; sample Resources in Education (RIE) and Current Index to Journals in Education (CIJE) entries; listings of mandatory educational and age level descriptors, publication/document types, and descriptors corresponding to publication type categories; and a guide for assigning subtype codes. Identifiers—*ERIC, Site Visits

This loose-leaf manual brings together in a single reference source all administrative requirements common to ERIC clearinghouse operations. Some contain relatively firm guidelines that should be followed closely; others contain more flexible guidelines and suggestions that, in their application, should be considered subject to the discretion of the individual clearinghouses. The manual is divided into nine sections: (1) "Introduction"; (2) "Management of Clearinghouse Operations," which covers processing, budget monitoring, major clearinghouse publications monitoring, record keeping, and system support groups; (3) "Personnel Management," which includes job descriptions, functional titles, and staff orientation; (4) "User Services," which covers extent of services, recommended materials, and form letters; (5) "Clearinghouse Publications," i.e., information analysis products (IAPs) and other major publications; (6) "Guidelines for Semiannual Reports," which covers management data, the statistical report, status report on major clearinghouse publications, involvement with professional organizations, and current "cutting edge" topics; (7) "Guidelines for Site Visits to ERIC Clearinghouses," which includes preparation by the clearinghouse for the site visit, conduct of the site visit, and post site visit actions; (8) "Guidelines for the Annual Review," which includes the presentation of the review and review material to government monitors; and (9) "Incremental Funding Requests," which covers requirements for submission, format of the request, business (line item) budget, and performance category budget. A list of ERIC-related acronyms and samples of various forms used by the ERIC clearinghouses are included. (BBM)

Identifiers—*ERIC

This thesis charts the development of a reference guide to searchable fields in the ERIC online database including identifying a target audience, planning and preparation of drafts, testing drafts with experienced online searchers and students, incorporating suggestions, and preparing and distributing the final version of the guide. The thesis reports that draft test results indicated the guide was successful in introducing and clarifying ERIC's searchable fields for searchers with moderate online experience; novice searchers needed more information about searching strategies than the guide provided. The thesis describes the ERIC database and introduces online searcher problems which prompted production of the guide. A literature review includes findings about the intended reading audience of searchers, background information about and user perceptions of the three major online vendors of the ERIC database, and research/advice about developing a concise and clear reference guide. A chapter on methodology describes development of questionnaires to solicit evaluation of the draft from groups of moderately experienced and novice searchers and from other reviewers, patterns which emerged from the responses, and incorporation of responses into the revised guide. Appendices contain copies of draft and final versions of the reference guide, search exercise/questionnaires for reviewers, and reviewers' suggested revisions. (LFL)

A broad range of education-related topics are addressed in this annotated bibliography, which presents citations and abstracts for 229 publications produced by the 16 ERIC Clearinghouses in 1986. An introduction describes the ERIC system, clearinghouse publications, the organization of this bibliography, and the availability of clearinghouse publications. A statistical summary by year (1968-1986) shows the number of publications included for each clearinghouse in the series of which this bibliography is the most recent. Document resumes are provided from the following clearinghouses: (1) Adult, Career, and Vocational Education; (2) Counseling and Personnel Services; (3) Reading and Communication Skills; (4) Educational Management; (5) Handicapped and Gifted Children; (6) Languages and Linguistics; (7) Higher Education; (8) Information Resources; (9) Junior Colleges; (10) Elementary and Early Childhood Education; (11) Rural Education and Small Schools; (12) Science, Mathematics, and Environmental Education; (13) Social Studies/Social Science Education; (14) Teacher Education; (15) Tests, Measurement, and Evaluation; and (16) Urban Education. Indexes for subject, author, and institution are provided. A listing of ERIC Digests, i.e., short user-oriented reference sheets formerly called Fact Sheets or Short Reports, is also provided for 1986. Also included is ERIC Ready Reference #9, which provides information on ERIC Digests, the ERIC Digests Online (EDO) database, and how to get connected to EDO and search it online, as well as

a form for ordering ERIC documents from the ERIC Document Reproduction Service (EDRS). (BBM)

Identifiers—*ERIC, *PSYCHLIT, SilverPlatter Information Inc, University of Missouri Columbia, User Training

These instructions are designed to help patrons of the University of Missouri-Columbia library perform searches on PSYCHLIT, a CD-ROM (compact disc, read only memory) version of the Psych Abstracts database, and a CD-ROM version of the ERIC database, both produced by SilverPlatter Information Services. Basic information is provided about the disk contents, use of the work station function keys, viewing and evaluating records, and printing search results. In addition, a four-part set of instructions, "How to Do a Search on the ERIC/PSYCHLIT CD-ROM Indexes," provides the following information: (1) instructions for performing a practice search using prescribed terms, displaying the retrieved records, and printing the search results; (2) instructions to enable a user to perform a search on a topic of his or her choice and to display and print the results; (3) helpful hints for completing a successful search; and (4) questions and answers about searching. A checklist of 22 items that a patron-trainee should be made aware of in order to use the ERIC and PSYCHLIT CD-ROM indexes and four suggestions for the librarian-trainer is also included. (KM)

Descriptors—Comparative Analysis, Computer Literacy, Education Majors, Evaluation Criteria, Higher Education, Indexes, *Intermed Differences, *Library Instruction, Library Surveys, *Online Searching, *Optical Disks, Reference Services, Use Studies

Identifiers—Current Index to Journals in Education, *ERIC, Resources in Education, *SilverPlatter Information Inc, Texas A and M University, User Preferences

This study conducted at Texas A&M University compares two types of training approaches using ERIC SilverPlatter (ERIC SP). Education students received either: (1) a one hour training session on basic search commands and strategies, or (2) a four page instructional handout that described basic search commands, Boolean logic, and special features with examples. Both groups performed searches using the system and then completed evaluation forms that inquired about academic background, previous computer experience, library experience, and user reactions to ERIC SP. Data obtained from the 73 users who completed the survey indicated that, while many users will need assistance with ERIC SP, the classes are not essential for the successful implementation of an ERIC SP service. The six figures attached to this report include lists of user comments and selected search topics as well as copies of the user survey and the instructional handout. (RP)

Descriptors—*Databases, *Educational Testing, *Information Retrieval, *Information Sources, Research Reports, Search Strategies, *Test Reviews

Identifiers—ERIC, ERIC Digests, Mental Measurements Yearbook, Test Collection (Educational Testing Service)

Recent emphasis on stricter educational accountability measures has resulted in a profusion of educational and psychological tests available in today's market. This ERIC Digest has been prepared to meet educators' needs to find information about tests quickly and easily. Three resources discussed are the Test Collection database, the Mental Measurements Yearbook database, and the ERIC database. Three topics are examined: (1) finding tests and other measurement instruments; (2) finding test reviews; and (3) finding studies about a certain test. The Test Collection database can be searched online for tests, using test-related terms as descriptors or identifiers. The ERIC database can be searched online using publication type codes, using test-related terms as major descriptors, and by combining publication type code and specific test-related descriptors. The Mental Measurements Yearbook database can be searched using subject classifications. Test reviews are also available in ERIC, using the descriptor "Test Reviews," and in the Mental Measurements Yearbook and its monthly updates. A test can also be searched using its specific name. ERIC as a Dissemination Agent: A Social System Perspective.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—Jun 87

Note—22p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Clearinghouses, *Educational Improvement, *Educational Research, *Information Dissemination, *Information Needs, Information Utilization, *Planning, Systems Analysis, Technology Transfer, User Needs (Information)

Identifiers—*ERIC

This study examines the conceptual and theoretical issues arising from the planned redesign of ERIC (the Educational Resources Information Center) and its potential new roles in the dissemination system. A three-level definition of the ERIC system is provided; the goal of making ERIC a comprehensive dissemination program is refined to one of making it a comprehensive information service; and the relationship of ERIC to other parts of a comprehensive dissemination system is described. Additional considerations that are discussed include the dilemma of choosing between indirect and direct strategies of service provision, the question of generalization versus specialization, and the value of cooperative relationships with other programs, particularly regional laboratories and research centers. Finally, the role of information in educational improvement is presented from the three perspectives of technology transfer, renewal, and facilitation. It is concluded that it is essential that ERIC become more firmly grounded in a theory of knowledge use, and that studies of ERIC be used in making design decisions. The text is supplemented with two figures, and 27 references are provided. (KM)

Oversight Hearing on OERI (The ERIC System).

Hearing before the Subcommittee on Select Education of the Committee on Education and Labor, House of Representatives, One Hundredth Congress, First Session.

Congress of the U.S., Washington, D.C. House Committee on Education and Labor.

Pub Date—30 Jul 87

Note—181p.; Serial No. 100-45. For related materials, see "ERIC Redesign. Papers Issued for Public Comment, 1986-1987" (ED 278 429).

Available from—Superintendent of Documents,

Congressional Sales Office, U.S. Government Printing Office, Washington, DC 20402.

Pub Type—Legal/Legislative/Regulatory Materials (090)

EDRS Price - MF01/PC08 Plus Postage.

Descriptors—*Access to Information, *Bibliographic Databases, Clearinghouses, *Educational Change, Federal Programs, Financial Support, Hearings, *Information Dissemination, Information Needs, Information Services, *Information Systems, Program Effectiveness, Technological Advancement, Users (Information)

Identifiers—Congress 100th, Educational Information, *ERIC

This oversight hearing was held to review the status of the 21-year-old Educational Resources Information Center (ERIC) program, which is administered by the Office of Educational Research and Improvement (OERI) in the U.S. Department of Education, and to hear administration proposals for the redesign of the ERIC system. This report of the hearing begins with an opening statement by the Hon. Major R. Owens, chairman of the subcommittee, who stressed the importance of the successful management of information and the need for adequate funding for the ERIC system. The report also provides transcripts of statements presented at the hearing and discussion of those statements, as well as prepared statements and testimony submitted to the subcommittee. Statements (and prepared statements) are included from: (1) Chester E. Finn, Assistant Secretary for Educational Research and Improvement, U.S. Department of Education; (2) Lynn Barnett, Chair of the ERIC Technical Steering Committee; (3) Donald P. Ely, Director of the ERIC Clearinghouse on Information Resources; (4) Don Erickson, Director of the ERIC Clearinghouse on Handicapped and Gifted Children; (5) Leslie Bjorncrantz, curriculum librarian and education bibliographer at Northwestern University; (6) Kenneth S. Tollett, distinguished professor of higher education, Graduate School of Arts and Sciences, Howard University; and (7) Charles W. Hoover, retired Director of ERIC. Additional testimony and prepared statements are also included from Natalie Felsher, Montgomery County (Maryland) Public Schools; Paula Montgomery, Maryland State Department of Education; Robert E. Chesley, an educational consultant and former Director of ERIC; and Laurie Garduque, Director of Governmental and Professional Liaison for the American Educational Research Association. (BBM)

Steps in Using ERIC.

ERIC Clearinghouse on Information Resources, Syracuse, N.Y.

Pub Date—May 87

Note—4p.

Pub Type—Guides - Classroom - Learner (051)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Databases, Guidelines, *Indexes, *Search Strategies, *Subject Index Terms, *Thesauri

Identifiers—Current Index to Journals in Education, *ERIC, Resources in Education

Designed for use in the reading room of the ERIC Clearinghouse on Information Resources, this set of three self-instructional guides provides step-by-step instructions for locating information in the ERIC system. The first instruction sheet explains how to use the Thesaurus of ERIC Descriptors to identify appropriate subject headings, or descriptors, for a given topic. The second and third guides explain how to use these descriptors to look for information in the two monthly indexes of ERIC, i.e., Current Index to Journals in Education (CIJE), which covers the periodical literature, and Resources in Education (RIE), which covers the document literature. The types of materials that are announced in RIE and CIJE are briefly described, as well as the location of journals and the ERIC microfiche collection on the Syracuse University campus. (RP)

Descriptors—*Clearinghouses, *Databases, Information Dissemination, Information Services, *Information Systems, Newsletters
Identifiers—*ERIC

The ERIC Administrative Bulletin (EAB) is the internal "house organ" of the Educational Resources Information Center (ERIC), the nationwide bibliographic information system covering the educational literature. ERIC is sponsored by the Office of Educational Research and Improvement (OERI) within the U.S. Department of Education. The EAB is prepared by the ERIC Processing and Reference Facility on the basis of material submitted by the ERIC Clearinghouses and other components of the ERIC system. The EAB is issued every month or two, depending on the volume of material available. All EAB articles are reviewed and approved by Central ERIC before publication. The EAB is distributed solely within the ERIC system (approximately 20 contractors) and is intended as an internal newsletter or journal of the ERIC system and a major means for the decentralized components of ERIC to communicate and interact with one another. The EAB is also a permanent record reflecting most of the major events in the life of the ERIC system (such as personnel changes, Standing Order Customer changes, etc.) and providing in printed form essential documents (such as ERIC policy and priority statements, Clearinghouse scope statement modifications, "ERIC Processing Manual" revisions, etc.). Current major categories for announcements are: Action Items; Network News; Personnel; Clearinghouse Publications; Meetings Participated In. All new forms and all major reports commonly are included as Attachments to EAB issues. This compilation consists of 116 issues of the EAB, extending from July 1976 through December 1987, a period of 12 years. (WTB)

Descriptors—Computer Uses in Education, *Databases, Demography, Employment Statistics, Higher Education, Information Retrieval, *Information Systems, *Local Area Networks, Program Evaluation, School Registration, *Schools of Education, *Student Records

Identifiers—ERIC, Michigan Professional Personnel Register, *Wayne State University MI

This brief paper discusses four of the computer applications explored at Wayne State University over the past decade to provide alternative solutions to problems commonly encountered in teacher education and in providing support for the classroom teacher. These studies examined only databases that are available in the public domain; obtained original documentation where possible for each database considered; and avoided elaborate analyses of data in favor of descriptive statistics. Successes realized and problems encountered are discussed for each of the four databases described: (1) a student data file from the registration data collected by the university for all students in the College of Education, which provided the foundation for the college's response to an accreditation review of all university programs in 1986; (2) the Michigan Professional Personnel Register, an annual census of the state's public school teachers, administrators, and other professionals, which has been used in studies of the college and its graduates; (3) the Educational Resources Information Center (ERIC), which has been mounted on a mainframe computer and made available to students at the university; and (4) the development of a local area network which is to be integrated into the teaching, research, and service functions of the college. Diagrams of the major components of the College of Education's computer-based information systems and the compo-

nents of the local area network are provided as well as 27 references. (RP)

Use of ERIC Materials by Certified School Personnel in Three Educational Service Regions in West Central Illinois.

Pub Date—87

Note—29p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Databases, Educational Practices, Indexes, Information Seeking, *Information Utilization, *Librarians, Online Searching, *Public School Teachers, Questionnaires, *School Personnel, School Surveys, Use Studies
Identifiers—*ERIC, *Illinois

Designed to determine to what extent the Educational Resources Information Center (ERIC) products and services are utilized by certified school personnel, this study found that, on the average, 25.1% of the teachers, librarians, counselors, and administrators in three educational service regions in west central Illinois have used Resources in Education, Current Index to Journals in Education, computer searching, and/or ERIC documents. A questionnaire was sent to 2,157 individuals, and the data are based on the 702 usable responses received (a return rate of 33%). Analyses of the data also indicated that: (1) most of the use occurred while respondents were graduate students; (2) respondents used ERIC materials to improve educational practices and for personal research; (3) when job assignment was related to use of ERIC, counselors, administrators, and librarians reported a higher percentage of use than classroom teachers; (4) years of service were generally inversely related to the use of ERIC products; and (5) with one exception, the higher the degree held, the more the individual had used ERIC and performed online database searching. A brief review of the related literature provides additional insight into the degree to which ERIC is used and recognized among school personnel, and some ways to increase awareness of ERIC among school personnel are suggested. A copy of the questionnaire is appended and nine references are listed. (CGD)

Identifiers—*DIALOG OnDisc, *ERIC, University of Maine

This user's guide to conducting a preliminary search of the ERIC (Educational Resources Information Center) database on CD-ROM (Compact Disk Read-Only Memory) begins by briefly describing the types of materials found in ERIC and explains the four steps common to the any computer search: (1) definition of topic elements and formation of concept groups of related terms; (2) gathering of terms of one concept group into a basic set of records; (3) modification of this set by adding new groups of related terms; and (4) display and printing of results. Computer commands and instructions for each of these steps are provided to reinforce the menus that appear on the screen during a search. Other useful commands are also briefly described, and students who wish more thorough searches of ERIC and/or access to information in other areas are advised to speak with the reference librarians. Identifiers—Educational Information, *ERIC

A broad range of education-related topics are addressed in this annotated bibliography, which presents citations and abstracts for 239 publications produced by the 16 Educational Resources Information Center (ERIC) Clearinghouses in 1987. An introduction describes the ERIC system, clearinghouse publications, the organization of this bibliography, and the availability of clearinghouse publications. A statistical summary by year (1968-1987) shows the number of publications included for each clearinghouse in the series of which this bibliography is the most recent. Document resumes are provided from the following clearinghouses: (1) Adult, Career, and Vocational Education; (2) Counseling and Personnel Services; (3) Reading and Communication Skills; (4) Educational Management; (5) Handicapped and Gifted Children; (6) Languages and Linguistics; (7) Higher Education; (8) Information Resources; (9) Junior Colleges; (10) Elementary and Early Childhood Education; (11) Rural Education and Small Schools; (12) Science, Mathematics, and Environmental Education; (13) Social Studies/Social Science Education; (14) Teacher Education; (15) Tests, Measurement, and Evaluation; and (16) Urban Education. Indexes by subject, author, and institution are provided. The 533 ERIC Digests produced by the clearinghouses through 1987 are also listed. Formerly called Fact Sheets or Short Reports, these short user-oriented reference sheets are arranged by clearinghouse. A directory of ERIC system components with addresses, telephone numbers, and brief descriptions of the clearinghouse scope areas is also provided, as well as a form for ordering microfiche or paper copy of ERIC Clearinghouse publications from the ERIC Document Reproduction Service. Descriptors—*Clearinghouses, Credibility, *Databases, *Evaluation Criteria, Information Services, Information Systems, Qualifications, *Quality Control, Selection, Surveys

Identifiers—*ERIC, *Manuscripts, Resources in Education, Reviewers

Reports responses of 15 ERIC Clearinghouses to three questions concerning the internal mechanics of evaluating unsolicited manuscripts for "Resources in Education": acceptance rate (average rate was cited as 50%); academic credentials of those who make final evaluation; and selection criteria. Eight sources are given. (EJS)

Frage, August

Beyond Publishing: A System of Scholarly Writing and Reading.

Pub Date—78

Note—Published by U'Mity of Toronto Press, Toronto, Canada, M5S 1A6.

Journal Cit—Scholarly Publishing; v9 n4 p291-311 Jul 1978

Pub Type—Journal Articles (080) — Opinion Papers (120) — Reports - Descriptive (141)

Descriptors—Databases, Information Centers, *Information Dissemination, *Information Services, Models, *Publishing Industry, Scholarly Journals Identifiers—ERIC, *Scholarly Writing

Discusses on-demand publishing as a solution to the information explosion and cites ERIC, which specializes in unpublished materials, as a model for such a solution. Topics covered include role and functions of scholarly publishing (selection and dissemination), fractional publishing, service publishing, and scholarly journals. Eleven sources are given. (EJS)
